SDWT-Sulphuric acid dosing station

Dorfstrasse 21
9621 Oberhelfenschwil CH
+41 71 375 66 30

Specifications:

This system offers increased safety for people, animals and the environment, especially for private use.

The housing is manufactured in the same style and materials as our electrolysis systems and offers space for one or two 25 liter canisters and a maximum of 5 dosing pumps.

The dosing pumps for the cell cleaning and pH regulation of your pool are located here.

The suction lance has four outlets and a level monitor that can be connected to the electrolysis system. This way the power connection of the pump and level monitoring are ensured.
